**ARCELOR MITTAL** – *Jaime CHACOFF GOMEZ - Research engineer*

The collaboration with Infoscrite went smoothly thanks to consistently fast response times. The annotation quality was consistently high, which allowed us to use the data efficiently.

Feedback during the annotation phase went seamlessly and was easy to follow, which facilitated rapid iterations and improvements. In short, the effective communication and exceptional annotation quality led to a successful project.

**MYCRONIC** - *Romain ROUX - R&D & Inspection Manager*

We were very satisfied with Infoscrite's service. This project required the use of an annotation tool developed in-house, as well as specific annotation rules that were sometimes difficult to anticipate on our end. Infoscrite demonstrated outstanding reactivity in proactively asking us to clarify annotation rules whenever they encountered edge cases.

This enabled us to achieve high annotation quality as well as an optimal delivery timeline, all at a very competitive cost. I would not hesitate to work with Infoscrite again given their professionalism, rigor, and reactivity.

**OCTARINA** – *Stéphane Dupasquier - CEO*

An efficient team: strong understanding of the work required, delivered on time.

**PROBAYES** - Vincent Bonnivard - PhD, AI Team Lead

Infoscribe performed invoice/receipt document annotation work for our company.

Their reactivity in responding to our request, understanding our needs, and providing a quote was remarkable. Their team then completed the annotation task within a very short timeframe, with excellent result quality.

We would not hesitate to call on Infoscribe again for future annotation projects.

**PROBAYES** - Joseph Defretin - Senior Data Scientist

I engaged Infoscribe's services to annotate a database for training a defect detector on images. The annotation required significant domain expertise, as numerous false defects were present and had to be ignored.

Setting up the engagement was very straightforward, from the quote through to receiving the annotated data. Infoscribe's teams quickly understood and integrated the domain knowledge. My only work consisted of writing a specification with a few examples, then validating the annotation quality on a small data sample with the project manager beforehand.

Infoscribe's added value is undeniable:

- The quality and precision of annotations are excellent.
- This was by far the most cost and time-effective solution compared to in-house annotation. It secured my timeline, my budget, and the performance expected by my end client.

**ETA COMPUTE** - Jeremi Wójcicki - PhD, Senior Chief Engineer

I'm very happy working with Infoscibe. So far we have successfully concluded 2 projects on image/video annotation

and data collection, which both went very well.

The Infoscibe team was very receptive to our feedback and they also satisfied particular requirements for our project. I'm looking forward to working with them in the future.

**Institut CEA Saclay – Nano-INNOV** - Mohamed CHAOUCH - Research Engineer - Computer Vision Expert

CEA-List and its partners have contracted multiple image annotation projects with Infoscibe. Each project systematically begins with dedicated training sessions on our tools and annotation methods, ensuring a thorough understanding of the subject and meticulous application of annotations.

The Infoscibe team demonstrated precision and efficiency, delivering high-quality annotated data. We also appreciated the reactivity and professionalism of the project managers. Our collaboration with Infoscibe is, and will remain, a key element in the success of our R&D projects in AI and computer vision.

**MiCROTEC** - Francesco Giammarchi - Data Scientist

The assigned projects required specific knowledge and involved a higher level of complexity, which was gradually but steadily achieved.

Communication was always efficient and prompt, allowing for quick feedbacks and consequent improvements.

Overall, the collaboration has been effective and fruitful.

**EXOTEC**– *Josephine SIMON- Senior Machine Learning R&D Engineer*

We have worked with Infoscibe on several occasions for detailed image annotation tasks. In each collaboration, we appreciated the clarity of communication, their responsiveness to feedback, and the consistently high quality of the work delivered.

**EXOTEC**

Infoscibe has always been transparent about timelines and has consistently met agreed deadlines. Project managers did not hesitate to reach out when certain aspects of the task description required clarification, and they quickly incorporated our feedback on initial deliverables to make adjustments when needed.

Overall, the collaboration has always been smooth, efficient, and of high quality.

# DEFENSE

**AIT Austrian Institute of Technology GmbH** - Andreas Kriechbaum Zabini -  
Thematic Coordinator - Computer Vision -Center for Digital Safety & Security

We greatly appreciate the excellent communication and responsiveness of the Infoscribe team demonstrated throughout several visual data annotation processes.

The ability to provide prompt replies to requests and being quickly available to address and correct the only few inaccurate annotations ensured a smooth and efficient workflow.

This approach not only maintained the quality of the annotations but also showcased your commitment to meeting our project requirements. Thank you for your work!

*Andreas Kriechbaum-Zabini, AIT Austrian Institute of Technology GmbH, who is leading the AIT work together with Infoscribe for a European project.*

**BERTIN TECHNOLOGIES** – Romain Pierre – AI and Software Engineer

We especially appreciate your outstanding responsiveness, as well as the speed and quality of the annotations delivered. You demonstrate genuine flexibility and know how to adapt to the project's specific constraints, whether in terms of number of batches, image volume per batch, or the frequency at which they are submitted. The delivery schedule is precise and has so far been met.

We also highlight the ability to provide feedback at no additional cost, which is greatly appreciated and significantly facilitates exchanges.

**SAFRAN TECH** - Camille CHAPDELAINÉ - Machine Learning Research Engineer

I was very satisfied with our recent collaborations. Infoscience has always been responsive to our requests, particularly in refining their deliveries to meet our needs, or in providing us with the means to verify batch deliveries.

Infoscience's project follow-up also struck me as very satisfactory, with a genuine commitment to meeting our needs, particularly by contacting us immediately whenever doubts about certain requests arose.

# AGRICULTURE

## **LIMAGRAIN** - Olivier ROBERT - R&D Engineer, Computer Vision

I have been collaborating with Infoscrite for two years on various projects related to the agriculture sector. Communication is simple and effective.

After outlining our annotation requirements, the project manager asks relevant questions to anticipate potential issues that may arise during annotation. This contributes to the quality of the work.

With Infoscrite, we are informed well in advance of any delays or ahead-of-schedule progress. Delivery deadlines are met, and the quality of work is very good. I plan to continue working with Infoscrite.

## **ABELIO.IO** - Oumaima El Mansouri - Engineer

We are happy to provide positive feedback on our collaboration with Infoscrite. Together, we have tackled several challenges, such as identifying Datura in corn and thistle in sugar beets. Infoscrite not only met our project requirements but even exceeded them through high-quality annotations delivered quickly.

This efficiency has allowed us to unlock several projects on our end. We look forward to continuing our collaboration with Infoscrite, appreciating the positive working relationship we have developed and the significant progress achieved.

In summary, our partnership with Infoscrite has been extremely productive, and we anticipate even more successful collaborations in the future.

**OKALA** - Johanna McQuade - Ecology Assistant

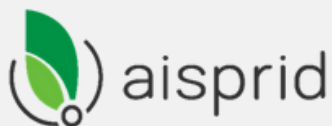

Infoscribe completed a project for okala, annotating a total of 97,125 images (2,501 image and 521 videos) from our camera trap data collected in Gabon.

This data is essential for us to have correctly labelled to train our AI models for our business. The team at Infoscribe followed a guide given by our ecology team and made sure to annotate all the images provided in the dataset to a high-quality standard.

The team were great at communicating with us for quality control to ensure we were happy with their annotations and completed the dataset in quick and timely manner.

Thanks to the team that did such fantastic work for us and we will hopefully work with you more in the future.

**AIRSPRID** - Doran STEPHAN - Backend Engineer

The collaboration with Infoscribe is going very well.

We are satisfied with the day-to-day reactivity of the teams and their ability to adapt to our challenges.

Infoscribe has responded quickly and professionally to the various projects we have submitted to them.

# AUTOMOTIVE

**VALEO GERMANY** - *Markus BACH - System Engineer*

Valeo is an automotive supplier, partner to all automakers worldwide. As a technology company, Valeo proposes innovative products and systems that contribute to the reduction of CO2 emissions and to the development of intuitive driving. It is a leading supplier for ADAS sensors worldwide and offers functions for safety, automated parking and driving.

In this context, the Valeo site in Kronach, Germany has been collaborating with Infoscibe for more than two years.

Infoscibe creates high-quality 2D and 3D annotations, which form the basis for our high-performance DNN-based perception.

Infoscibe has shown great flexibility with regard to a variety of environments, sensor types and mounting positions as well as annotation requirements and necessary adjustments.

Overall, Valeo has full trust in Infoscibe's work as an annotation company and looks forward to continuing the cooperation.

**ACV AUCTIONS** - *Jean Thuriere Van Valkenburg - Data Product Manager*

I would like to thank Infoscibe for their collaboration.

Their team adapts quickly to changes in guidelines and demonstrates a strong understanding of the expected quality standards.

This makes Infoscibe a reliable partner, offering very competitive pricing.

**PARIFEX** - Zeming LIU, PhD Responsable de la recherche et de l'innovation

For the past three years, Infoscribe has provided valuable support in advancing our AI project.

Their annotation services adapt to all types of our data, from point clouds to optical images. The quality of the annotations delivered is consistently high.

The Infoscribe.ai team and Mr. Mathieu Guimard are always attentive, providing continuous support throughout the project and demonstrating exemplary responsiveness when facing challenges.

Regardless of the project size, our requests are always handled in a timely manner. We are very satisfied with our collaboration with Infoscribe.

**VALEO FRANCE** - Jean-François DUGUEY - Machine Learning Engineer

We have been very satisfied with our collaboration with Infoscribe over several years.

The quality of the annotations is excellent, whether for objects in images or LiDAR data.

Infoscribe has also consistently met its delivery deadlines.

**SYN2CORE GmbH** - Saman Vafadar - CTO

I've worked with Infoscribe since 2023 across two different startups in France and Germany.

What initially motivated us, and continues to do so, is the consistently high quality of their work, their responsiveness to our annotation projects in terms of delivery timelines, and their flexibility when project requirements evolve on our side.

They've also proven highly reliable during sudden large-scale projects with very short deadlines.

Last but not least, their competitive pricing makes them a trusted partner for our annotation needs, and we would confidently recommend them for similar projects.

# MEDICAL

## **DOCTOLIB** - Biljana Knežević - Technical Lead for Annotation Programs

I had the pleasure of working with Infoscribe on a medical text data annotation project, specifically for labeling medical terms as part of a named entity recognition task. I would like to express my satisfaction with their professionalism and expertise in this area.

Infoscribe demonstrated a strong ability to manage the project from start to finish. Their project management was exemplary, meeting agreed deadlines and ensuring that every stage of the annotation process was properly followed. Their team consistently showed strong organization and a proactive approach.

Communication with Infoscribe was also very clear. They maintained open and consistent dialogue throughout the project, which facilitated collaboration and allowed for quick adjustments based on feedback. Their flexibility and ability to adapt were particularly valuable, ensuring that the annotations fully met our expectations and quality standards.

In conclusion, I highly recommend Infoscribe for any data annotation project, particularly for medical term labeling. Their professionalism, project management expertise, and clear communication make them a reliable partner. I am confident they will continue to meet future needs and would gladly work with them again.

# SMART CITY

## **XXII** - DAM Mulhem - VP AI ORCHESTRATION

We had the opportunity to work with Infoscibe on our computer vision models. Our needs focused on tracking annotation, and their team was consistently available, knowledgeable, and able to move the project forward effectively, allowing us to achieve our objectives under the right conditions.

## **AKANTHAS** - Nicolas Jaouen - Co-founder & CTO

I had the pleasure of working closely with Infoscibe on image annotation services. Their professionalism, flexibility, and proactive approach to our project were outstanding. They consistently demonstrated a strong commitment to delivering high-quality results while adapting to our specific needs.

Working with Infoscibe was a smooth and efficient experience, and I would highly recommend their services to anyone looking for top-tier image annotation solutions.

## **ENLAPS** - Adrien Fontvielle - R&D Leader - Image processing & cameras

We are very satisfied with our collaboration with Infoscibe. They quickly and efficiently integrated our annotation guidelines, including all their specific requirements.

The feedback loop between our teams was effective, enabling a rapid increase in annotation speed while minimizing the need to re-annotate large portions of data. We will certainly work with them again on future annotation projects.

## **AEROMETREX** - Fabrice Marre - R&D Manager

We had a great experience with Infoscibe to produce solar panels annotations from our aerial imagery. The team followed our specifications and delivered high-quality annotations within our specified timeline which contributed to our project's success.

The communication was seamless and the team was proactive in addressing our feedback.

We recommend Infoscibe to any organisation seeking excellent annotation services.

## **QUANTAFLOW & ECO COMPTEUR** - Nabil BOUDARRAT - R&D Project Manager

My collaboration with Infoscibe on behalf of Quantaflow and Eco-Compteur was marked by the dynamism and responsiveness of their teams.

The project managers maintained continuous collaboration throughout our projects, remaining attentive to our needs and ready to revise deliverables when necessary.

## **BLACK MOTH VISION SYSTEMS** - Matthew GARRETT

Je travaille pour Black Moth, une entreprise spécialisée dans les systèmes de vision. Je souhaite recommander Infoscibe sur la base de notre collaboration professionnelle au cours des deux dernières années. J'ai eu l'occasion de travailler avec Infoscibe sur plusieurs projets de classification d'objets, et j'ai été systématiquement impressionné par la qualité de leur communication et leur sens du détail. Ils ont fourni des données de grande qualité et ont démontré une compréhension approfondie des enjeux propres à mes projets.

## **NVISIONIST** - Ikaros Frangos- Project Manager

We have been working with Infoscrite AI since early 2025 across multiple annotation projects, covering utility infrastructure elements and fiber-optic cable systems inside telecom cabinets.

What makes Infoscrite stand out is their ability to handle technically demanding annotation tasks, complex class structures, strict physical routing rules, precise attribute tagging, while integrating seamlessly into our production AI pipeline.

Their team grasps both the annotation logic and the constraints of a deployed system, which is rare. From polygon segmentation to bounding box annotation, they adapted to evolving specifications without friction.

We would not hesitate to recommend Infoscrite AI to any Greek company building serious computer vision products.

# SPORTS

## **OCHY** - Victor Dequidt- CEO

As part of developing a human pose estimation model, we collaborated with Infoscribe on the annotation of complex data requiring a high level of precision. The project involved identifying specific keypoints (notably PSIS), which required strong domain expertise and a detailed understanding of anatomy and related constraints.

From the outset, the Infoscribe team demonstrated a high level of professionalism. After a precise initial scoping phase, we worked closely together to fully align the annotation criteria with our particularly demanding requirements. Several iterations were carried out, always with rigor and method, until the expected level of quality was achieved. Their ability to quickly integrate feedback and adjust guidelines was a significant asset.

Beyond the technical quality, we particularly appreciated their responsiveness and the smooth communication throughout the project. Interactions were always constructive and efficient, which greatly facilitated progress.

Finally, deadlines were consistently met, allowing us to stay aligned with our development schedule.

We sincerely thank the Infoscribe team for their commitment and

## **UNIQFEED** - Anđelo Martinović – Segmentation Manager

My team started using the services of Infoscribe in early 2022, for semantic segmentation annotations of sports images. The quality of annotations was high, and they helped us improve our product. Later,

in December 2022, we were in a rush to get a new batch of data annotated as quickly as possible. Infoscribe was very quick to respond, make an offer, and deliver all the images in time, despite the Christmas/New Year holiday season.

As we were again satisfied with the quality, in 2023 we scaled up the next batch of images by a factor of 10. This was also delivered in time and helped us improve our product further.

**TRACAB** - Tiesheng Wang - Senior Data scientist

Over two years ago, we began a partnership with Infoscrite, which has proven to be highly productive. Their expertise has been instrumental in annotating bounding boxes, body segments, and keypoints for our projects.

We are extremely satisfied with the quality and efficiency of their work. Infoscrite consistently delivers quickly without compromising accuracy. We look forward to further collaboration with Infoscrite across a wide range of tasks.

Our satisfaction with their services makes Infoscrite an invaluable partner for data annotation. We confidently recommend Infoscrite for any data-related services you may require.
